

# XAG P100 PRO SPRAYER DRONE

**6 gal/min**  
Dual pump flow rate

**13.5 gal**  
Liquid Tank

**110 lbs**  
Payload

**60 acre/hr**  
Efficiency with  
2 gal/acre rate

**Folding Arms**  
Save 65% of Space for  
Transportation and Storage

**Assisted Manual Fly**  
Flight Lane Assist  
One tap to change Lane  
Adaptive Spray Rate Control

**57" Blade**  
More powerful Motor  
110 lbs payload

**264 ft Detect Range**  
4D Obstacle Avoidance  
Radar

### Blade Design and Motor

- Break through propeller aerodynamic design
- 57" blade
- Even more powerful motor
- Up to 110 lbs payload capacity

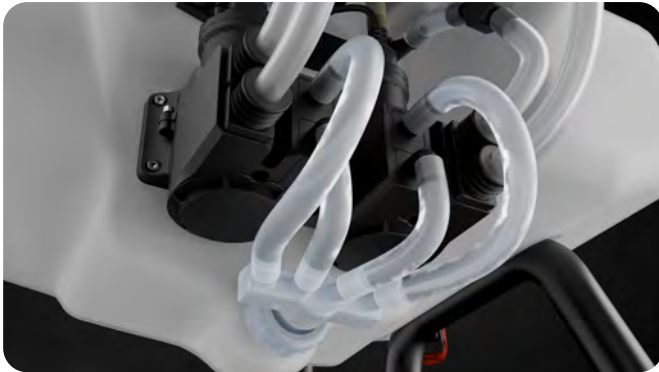

### Folding Arm and Modular Design

- Save 65% of space
- Detachable flight platform from Sprayer and Spreader
- Arm designed to release stress in the flight
- IPX6K Water Proof for high pressure water jet wash

### Double Peristaltic Pump with 6 gal/min flow rate

- Max flow rate 6 gal/min
- Dropset from 60~400 microns
- Spray swath up to 33 ft
- Pump durability increased by 3 times

### Dual Camera for mapping boundaries

- Front and downward cameras allow the operator to manually fly and map field boundaries

### ARC3 Pro Controller

#### Assisted Manual Flight

- Lane keeping assistance in manual flight
- One tap to switch lane
- Adaptive spray volume by flight speed

#### Full Autonomous Flight

- Automatically create flight plan
- Allow two drones swarm

### No cellular service and No RTK service required

- No cellular service is needed for the operation
- Connect drone and phone through ARC3 Pro Controller
- Allow GPS or Virtual RTK-guided operation
- Allow manual position correction
